

GDS Price List

Effective December 1, 2017

3D Laser Scanning

3D Laser Scanning – Our laser scanning service includes a site survey of your residential or commercial property. Each room of the property will be scanned to create a 3D point cloud file of the property. The 3D image will be used in AutoCAD to create very accurate 2D floorplan of the existing structure. You will receive both the AutoCAD and point cloud files.

We use the Faro Focus M70 for all our point cloud scanning. It will work indoor and outdoor with a range of 70 meters and is accurate within 3 millimeters.

| | |
|--|----------|
| Base Fee | \$500* |
| Each square foot of building being scanned | \$1* |
| Site Plan..... | \$200* |
